Title: EXCLUSIVE! Sony TV's show Hum Rahein Na Rahein Hum is CONFIRMED to go off-air

Source: Tellychakkar.com

URL:

<https://www.tellychakkar.com/tv/tv-news/exclusive-sony-tvs-show-hum-rahein-na-rahein-hum-confirmed-go-air-230904>

MUMBAI: TellyChakkar is back with yet another interesting update from the world of television.

The year 2023 has seen a lot of new shows launching and many shows going off-air.

Sony TV launched a series of shows this year like Bade Achhe Lagte Hain 3, Challang, The Kapil Sharma Show and Mere Sai among others bid adieu to the viewers.

ALSO READ: Hum Rahein Na Rahein Hum: Oh No! Shiv brings Roshni and Mohit to Ranak Palace

And now, one more show is all set to go off-air which is Hum Rahein Na Rahein Hum.

It stars Jay Bhanushali and Tinaa Duttaa in the lead roles.

The show started off on a grand note in April this year and since a few weeks, there have been reports about it going off-air.

There was no confirmation yet but now, the rumours have turned out to be true.

The show is confirmed to go off-air soon. However, no exact date is known yet.

Hum Rahein Na Rahein Hum also stars Karanvir Bohra, Anita Hassanandani, Kitu Gidwani, Perna

Wanvari, Gayatri Gauri among others in pivotal roles.

How much are you going to miss the show? Tell us in the comments.

Stay tuned to TellyChakkar for all the latest updates.

Title: The loud Sony SRS-XG300 boombox Bluetooth speaker can still be yours for 43% off its price on Amazon

Source: PhoneArena

URL: [https://www.phonearena.com/news/sony-srs-xg300-amazon-deal\\_id150253](https://www.phonearena.com/news/sony-srs-xg300-amazon-deal_id150253)

Sony SRS-XG300: Now 43% OFF on Amazon! Grab the Sony SRS-XG300 Bluetooth speaker from Amazon and save \$152 in the process. The speaker has a loud sound and a high water-resistance rating. It's perfect for parties and big gatherings. \$152 off (43%) Buy at Amazon

Before you pull the trigger on this one, however, we must warn you that the Sony SRS-XG300 is not a speaker you can just grab and go riding your bike or climbing a mountain. This thing is huge, which makes it unsuitable for such activities. On the other hand, the larger size of the Sony SRS-XG300 makes it perfect for parties and large gatherings.

The sound on this thing is loud. It even features a special function dubbed Mega Bass, which improves bass, thus giving you that extra oomph you probably want to have if you are a hip-hop lover. The speaker also supports Sony's Music Center app, which boasts its own EQ, allowing you to adjust the SRS-XG300's sound completely to your preferences.

Additionally, the Sony SRS-XG300 has an IP67 dust and water resistance rating, which is awesome if Mother Nature decides to end your amazing gathering with heavy rain.

Regarding the battery, the Sony SRS-XG300 delivers up to 25 hours of playtime on a single charge. However, we must also note that battery life depends on how loudly you are listening, so the speaker won't be able to survive for that long if you have turned the volume up to eleven.

With an awesome loud sound, an IP67 rating, and now a lower price, the Sony SRS-XG300 is worth every dollar. So be sure to grab one at a discount while you can. The Summer may be ending, but that doesn't mean the next few months won't offer sunny days to organize fun gatherings. However, one of the ingredients required for an exciting gathering or small party is music, which means you will need a loud Bluetooth speaker with great sound. That said, such speakers come at a hefty price, so it would definitely be nice if you could get one with a nice discount. Well, we guess fortune is on your side today since Amazon is still selling the awesome Sony SRS-XG300 party speaker at an incredible 43% discount. If you pick up your phone, open your calculator app, and, well, start calculating, you will see you now have the chance to save \$152 if you grab a Sony SRS-XG300 through this amazing deal right now.

Title: Sony PlayStation Portal: price, availability, and how to preorder

Source: The Verge

URL:

<https://www.theverge.com/2023/8/31/23850592/sony-playstation-portal-preorder-buy-price-availability-release-date>

For months, rumors have been circulating about the release date for Sony's upcoming handheld, the PlayStation Portal. Now Sony has finally given us an answer: the PlayStation Portal will launch on November 15th. The portable device, which will be able to stream PlayStation 5 games over Wi-Fi, will retail for \$199.99.

There is a chance the PlayStation Portal will sell out as quickly as the PlayStation 5 did when it was first released, which is perhaps why Sony is currently limiting orders to one device per customer. We have yet to test the Portal, but if you're someone who wants to secure a unit at launch, rest assured that Sony has already opened up preorders in the US and several other countries. Here's what you need to know.

### Where to preorder the PlayStation Portal

The PlayStation Portal is a handheld device that can connect remotely to your PS5 over Wi-Fi. As a result, you can stream preinstalled PS5 games to the Portal's eight-inch LCD screen, which runs at up to 1080p resolution and 60fps. The device also sports controllers on either side, which are reminiscent of Sony's DualSense Wireless Controller for the PS5 (they even support adaptive triggers and haptic feedback).

Sadly, the Portal doesn't support Bluetooth, meaning it won't be able to connect to your standard pair of wireless headphones. It does support Sony's proprietary PlayStation Link

wireless technology, however, allowing you to connect it to the forthcoming Pulse Explore earbuds and Pulse Elite headset. There's also a 3.5mm headphone jack in case you prefer a wired headset or pair of wired headphones.

**PlayStation Portal \$ 200** The PlayStation Portal is a handheld device that allows you to play PlayStation 5 games over Wi-Fi. You can connect it to PlayStation Link-supported devices like the Pulse Explore or a set of wired headphones. \$200 at PlayStation

At the moment, you can only preorder the PlayStation Portal ahead of its November 15th release date via Sony's official PlayStation Direct storefront. According to an updated post on the PlayStation blog, other retailers will allow customers to place preorders starting September 29th, so stay tuned as we'll update this post when we learn more.

Also, note that only those in select regions "such as the US, UK, France, and Belgium" are currently able to preorder the PlayStation Portal. That said, customers in other areas, including Canada and Japan, will be able to place preorders beginning September 29th.

Title: How to Turn the Sony a7C II Into a \$6000 Cinema Camera for Just \$300 (Sort Of)

Source: Fstoppers

URL: <https://fstoppers.com/diy/how-turn-sony-a7c-ii-6000-cinema-camera-just-300-sort-639568>

The brand new Sony a7C II offers a huge amount of tech in a very compact body. What if you could supercharge it so that it suddenly had most of the functionality of a cinema camera? Can you get the best of both worlds? How much would it cost?

Longtime enthusiast of innovative rigs Caleb Pike has put together an ingenious package that gives you the stability and functionality of something like the Sony FX6 but without compromising the convenience and compact build that are fundamental to Sony's brand new a7C II.

This looks like something that SmallRig would consider for its DreamRig program – especially when you consider how many parts are from SmallRig themselves. Since 2017, SmallRig has been offering customers the opportunity to pitch ideas for rigs that would make their filmmaking easier, and more than a few of them have gone into production.

It makes you wonder what other cameras would be a good candidate for this sort of build-out. With its 6.2K 30p, 10-bit video, and internal ProRes 422 HQ, the Fujifilm X-H2S might be an option. What would your suggestion be?

Is this the ideal solution for filmmakers on a budget who need to squeeze as much performance as possible from a single camera body? Let us know your thoughts in the comments below.

Title: OTT Review: Scam 2003: The Telgi Story - Hindi web series on Sony LIV

Source: 123Telugu

URL:

<https://www.123telugu.com/reviews/ott-review-scam-2003-the-telgi-story-hindi-web-series-on-sony-liv.html>

Release Date : September 01, 2023 123telugu.com Rating : 3/5 Starring: Gagan Dev Riar, Talat

Aziz, Sana Amin Sheikh, Hemang Vyas, Sameer Dharmadhikari Director: Tushar Hiranandani

Producers: Applause Entertainment, Studio NEXT Music Director: Ishaan Chhabra

Cinematographer: Stanley Mudda Editor: Kunal Walve Related Links : Trailer

After the super successful Scam 1992, the makers have now come up with a new show titled Scam 2003. This new series, directed by Tushar Hiranandani, is based on the 2003 Stamp Paper Counterfeiting scandal worth 30,000 crores. The makers got inspired by the book Telgi Scam: Reporter's Ki Diary. Gagan Dev Riar played Abdul Karim Telgi, the man who committed this scam. Let's see how the series is.

Story:

Abdul Karim Telgi (Gagan Dev Riar) is a small-time fruit vendor, and he is given a receptionist job in a hotel by Shaukat (Talat Aziz). Abdul Telgi falls in love with Nafisa (Sana Amin Sheikh). Abdul Telgi lives in the Gulf for a few years and returns to India. He starts a business where he makes fake documents to help poor people travel to Gulf countries. Abdul gets arrested, and in jail, he comes across Kaushal Jhaveri (Hemang Vyas).

Both start an illegal business, and one day, Abdul Telgi realizes that the stamp paper business is more valuable than anything else. Abdul convinces Kaushal to commence the fake stamp paper

business, and the former comes up with a solid plan. While everything is going well, Abdul Telgi lands in an issue that affects his business. What did Abdul do next? How did he manage to carry out such a big scam? This forms the crux of the story.

#### Plus Points:

The makers deserve special appreciation for bringing into light one of the biggest scams in the country. Though this is a massive scam in terms of monetary value, not many are aware of it, and the show neatly showcases how a fraud of this size was carried out in a detailed manner.

Gagan Dev Riar gave a spectacular performance, and he brought life to Telgi's character. What catches our attention is the way Gagan Dev portrayed the Abdul Telgi character in a natural manner. His body language, dialogue delivery, and subtle acting are the biggest assets of the show. He is ably supported by Hemang Vyas.

The show has a good message to the audience, which is about greed, and this has been convincingly shown through Hemang's role. The team did an extensive research on the scam. Abdul Telgi's journey after being sentenced to jail is presented superbly. Especially the portions related to the Nashik printing press came out quite well and intrigues the viewers.

#### Minus Points:

The pacing is slow for the most part, and especially the initial couple of episodes could have been way better. While the subject is interesting, the screenplay should have been watertight. The show has a resemblance to the recently released Farzi series, and a few scenes will surely remind us of the Shahid Kapoor and Vijay Sethupathi starrer.

While the makers retained the Scam 1992's title theme, the show could have been a lot better regarding emotions. The family angle of Telgi isn't explored well, and there are hardly any scenes that establish Abdul Telgi's attachment to his family. This is one of the aspects where Scam 1992 is superior than Scam 2003.

#### Technical Aspects:

The music by Ishaan Chhabra is intriguing. Stanley Mudda's cinematography is good. The art direction team did a fabulous job of showcasing the bygone era. The production values are solid. The editing could have been far better. The dialogues aren't that effective.

Coming to the director, Tushar Hiranandani, he did a decent job with the series. Hansal Mehta is the creative director of this show, and his mark is visible in a few scenes. It is somewhat interesting as the makers chose to tell this story in two parts, which might not please everyone. Though the show doesn't give a wow feeling, it is still decent, with solid performances and some interesting scenes.

#### Verdict:

On the whole, Scam 2003: The Telgi Story Part 1 is a watchable series with good performances from the cast. It is laudable as the makers have put out such a massive scam related to stamp papers in the open. While the subject is interesting, the screenplay and pacing could have been still better. It needs to be seen what the second part has in store for us.

Title: High View takes over Sony Pictures channels

Source: Broadband TV News

URL: <https://www.broadbandtvnews.com/2023/09/01/high-view-takes-over-sony-pictures-channels/>

German media company High View takes over the Sony Pictures channels Sony AXN and Sony Channel as well as the SVOD service Sony One in German-speaking countries on September 1, 2023. No details were given on the purchase price.

“We are very pleased that these high-quality premium offerings will become part of our portfolio,” said a High View spokesperson. “The acquisition is an important strategic step and the brands perfectly complement our line-up, which stands for high-quality and target group-specific offers. We will continue the long-term content partnership with Sony Pictures Television and plan to further expand the offerings, especially the VOD part in the market, with other strong partners.”

With the acquisition, the two pay-TV channels get new names: Sony AXN becomes AXN Black and Sony Channel becomes AXN White. The SVOD service Sony One will be renamed AXN+. The programme focus remains unchanged: AXN Black will continue to run US action series while AXN White will show European series. Advertising sales will continue to be handled by Goldbach Germany.

The takeover plans became known in July 2023. High View already operates a range of free TV music channels under the umbrella brand Deluxe, pay-TV channels such as Gute Laune TV and Jukebox as well as thematic channels and FAST Channels.
